

Seismic dip line A-A' near Marmora C-34 (well is projected 150 meters). The upper Missisauga (yellow horizon) represents the pay sand (Sand 1). Salt rollers are shown in green and potential welded salt feeders are dashed black lines. The white inset box outlines an area of the seismic profile penetrated by Marmora C-34 that is shown in greater detail in figure 13. The gamma ray log is shown to the left of the borehole.
